Registration is now open.
www.ebworldcongress.org

The first global congress on EB will be held in London in January 2020. This ground-breaking meeting will, for the first time, bring together all global knowledge in EB research, clinical management and the EB community.

The pooling of state-of-the-art knowledge across the key stakeholders will not only give guidance to the professionals involved in EC, but also help in the development of strategies for the research, regulatory, funding and healthcare communities.
